### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Arthur Behiel on 11/17/04.

The application has been amended as follows:

IN THE CALIMS:

Cancel the newly submitted claims 19-24.

2. The following is an examiner's statement of reasons for allowance: The prior art does not teach a photolithographic process for making MEMS structures including the step of defining a raised pattern and a recessed area in an exposed portion of a first material layer and then etching the exposed raised pattern and recessed areas of the first material layer until a second material layer is exposed to leave the pattern affixed to a second material layer.

3. Applicant's argument filed on 9/2/04 is persuasive as to the point that the closest prior art Chang et al (5,959,516) teach a process to define a raised pattern and a recessed portion as shown in figure 5a.

Chang et al do not teach etching the raised pattern, wherein the etching is limited to only recessed portions (see, area 24 in figure 5b).
